

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country voyage in their RV. Newly retired, after spending many years working with his brother to assemble their crane business into an market leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road expedition.

All through their trip, John reacquainted himself with former business acquaintances along the way. In combination with these conversations and a significant event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast marketplace for a product that could quickly and securely elevate people in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John formed a joint venture with two friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they built and sold the first JLG aerial work platform. The business incorporates many of the basic design elements of that original lift into existing designs.

JLG lift trucks have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the business proudly continues to expand itself into many marketplaces globally and develops new products to ensure clients are capable of being more effective and perform in the workplace within a safer environment.
